CLAIMS 1-22 ARE PRESENTED FOR
EXAMINATION

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over applicant's admissions..

Applicant admits at page 1, lines 3 - 38 that insulin and the compounds set forth in claim 1 are known to treat diabetes.

As stated in *In re Kerkhoven*, 626 F.2d 846, 205 USPQ 1069, at page 1072 (CCPA 1980):

"It is prima facie obvious to combine two compositions each of which is taught by the prior art to be useful for the same purpose, in order to form a third composition which is to be used for the very same purpose. *In re Susi*, 58 CCPA 1074, 1079-80, 440 F.2d 442, 445, 169 USPQ 423, 426 (1971); *In re Crockett*, 47 CCPA 1018, 1020-21, 279 F.2d 274, 276-277, 126 USPQ 186, 188 (CCPA1960). As this court explained in *Crockett*, the idea of combining them flows logically from their having been individually taught in the prior art. "

Art Unit: 1617

In this application it would have been prima facie obvious to administer conjointly insulin and compound of claims 1-13 to treat diabetes with the compositions of claims 14-22.

A careful review of the data presented in the specification fails to establish a synergistic effect for the claimed composition.

It is suggested that applicant provide the U.S. Patent Office with data which establishes a synergistic effect for the treatment of diabetes.

None of the claims are allowed.

The requested correction has been forwarded to the Application Branch for processing.
